

Personal Response Systems

for your
DVA Clients

What are Personal Response Systems (PRS)?

Tunstall PRS support the wellbeing of veterans living independently or with the assistance of a carer. They create a smart home environment, linked to an alarm, that's monitored 24/7 by our Customer Care Centre – to provide assistance when veterans need it most. Mobile Personal Response Systems are also available, to provide safety outside the home.

Tunstall is a contracted PRS supplier to the **Department of Veterans' Affairs (DVA)**.

What is the Rehabilitation Appliances Program (RAP)?

The RAP provides aids, equipment and home modifications – according to each individual veteran's assessed clinical needs – to help DVA clients live safely and independently at home and in the community.

Medical alarms and care sensors are part of the National Schedule of aids and appliances available through RAP.

Which Tunstall products are funded by RAP?

All of Tunstall's leading Personal Response System are eligible for funding through the RAP – including medical alarm bases and radio trigger pendants connected to our 24/7 monitoring service, as well as standalone GPS personal units.

Is my client eligible for a RAP-funded Tunstall product?

Members of the veteran community are eligible if they have been assessed as having a clinical need for a Personal Response System by a qualified health provider, including:

- Occupational Therapist;
- Registered Nurse;
- Physiotherapist;

The client must also be a:

- Gold Card holder, or
- White Card holder (only for conditions accepted by the DVA as being related to service).

How do I refer my client to Tunstall?

To refer a client for a RAP-funded PRS, you must complete and submit a [DVA D9199 assessment form](#).

You can send completed forms via fax to [\(07\) 3637 2255](tel:0736372255), or email to au.customerservice@tunstall.com
