# Mobile Personal Emergency Response System

## Key features

The find-me Watch is a Mobile Personal Emergency Response System (mPERS) that works anywhere there is mobile phone coverage and offers two way (hands free) voice communication, a panic alert, fall detector and assists to locate the wearer using GPS.

With no complicated touch-screens or set-ups, the watch uses its own SIM, allowing it to connect to the mobile network without the need for a separate mobile phone. This ensures the watch is the easiest solution to use for the wearer, providing them security everywhere they go.

Whether onsite or on the move, Find-me is with you where-ever you go. Keeping you in touch with the people that matter.

### Who is it for?

Construction workers	Healthcare professionals
Security personnel	Emergency services
Mining	Lone worker
Transportation workers	Government

24/7 monitoring provided by

**Tunstall**

### MAN DOWN

In the event a worker falls and is knocked unconscious there are 3 key features of the Find-me watch that help to identify when a worker needs emergency assistance:

1. **Fall Sensor** can be set to alert
2. **No movement** alert set in the event that your worker is unconscious
3. **Auto answer** if there is no response, the watch can be dialled into and set to automatically answer and initiate a 2-way call.

### MOBILE PHONE

The Find-me Watch has it's own SIM and works like a mobile phone. It can call two preprogrammed numbers, as well as the pre-set emergency or monitoring number. You can also call the watch from any phone ensuring instant contact without time-consuming ring-around delays.

### GPS LOCATOR ASSIST

The Find-me Watch assists to locate the wearer by seeking out a GPS position once every 3-10 minutes. All GPS locators will always give the most accurate location outdoors, this includes the Find-me Watch.

### WEB INTERFACE

The easy-to-use web interface is designed for nominated users to securely monitor the wearer's location using any internet enabled device, including smart-phones. The login allows the nominated user to quickly and easily customise or change settings.

### 24/7 MONITORING CENTRE

With Tunstall Healthcare's 24/7 monitoring centre help is available from their expert team, any time of day or night, 365 days a year.

### WATER RESISTANT

The Find-me Watch will work rain or shine. The wearer is covered in all conditions.
